# ARCHITECTURE AT MONASH

BE AN ARCHITECT

The Bachelor of Architectural Design teaches you to think beyond the building and learn how to create compelling solutions that transform the way people live, creating spaces, places and communities that improve their quality of life.

The three-year **Bachelor of Architectural Design** is your first step to becoming a registered architect and forms part of a five-year specialist degree with the **Master of Architecture**, which meets the academic requirements that leads to registration as an architect.

STRUCTURE

## BACHELOR OF ARCHITECTURAL DESIGN SAMPLE COURSE PLAN

CRICOS code: 059372G

### YEAR 1

Semester 1	Foundation Studio 1	Architecture Communications 1	History and Theory of Art, Design and Architecture

## MASTER OF ARCHITECTURE SAMPLE COURSE PLAN

CRICOS code: 097034K

### YEAR 4

Semester 1	Advanced Architecture Project 1	Advanced Architecture Studies 1	Elective
Semester 2	Advanced Architecture Project 2	Advanced Architecture Studies 2	Elective

### YEAR 5

Semester 1	Advanced Architecture Project 3	Advanced Architecture Studies 3	Professional Practices
Semester 2	Final Architecture Project	Architecture Research	Advanced Architecture Studies 4 or Level 5 Elective

■ Advanced Studies ■ Applied Professional Practices ■ Electives

## ACCREDITATION

The Master of Architecture is accredited by the Architects Accreditation Council of Australia (AACA).

GUARANTEED  
ENTRY INTO  
MASTERS

Our Bachelor of Architectural Design students are **guaranteed a place in the 2 year Master of Architecture**. This will allow you the peace of mind to continue your studies to gain professional accreditation and the ease of transition to postgraduate studies, with our supportive staff to prepare you for the industry.

HANDS-ON  
STUDIOS

You'll study every aspect of architecture in this hands-on, studio-based degree with **more than half of your time in the design studio or projects**. The design studio is a **project-based problem-solving experience** where you work in small groups or individually on complex issues to develop a range of creative interventions and responses. The 'studio' models the way architects work with clients in an iterative process to achieve an outcome.

WORK  
INTERGRATED  
LEARNING

From first year you'll **work on real-world and speculative projects** on campus or on-site with academics and industry professionals that provide industry insights, connections and introductions.
