

PhD Scholarship Opportunity

- School of Public Health and Preventive Medicine
- \$33,106 tax-free stipend per annum (indexed)
- Longitudinal study of Australians impacted by COVID-19
- Supportive, equitable working environment
- Principal Supervisor: Professor Alex Collie

Receive high quality research training while working on a project tracking Australians who lost their jobs or had their work impacted during the COVID-19 pandemic. The project aims to:

- characterise the health and employment outcomes of people whose work was impacted by COVID-19.
- determine the personal, psychological and social factors that affect health and employment outcomes.
- understand how workplaces respond to the changing nature of work during the COVID-19 pandemic

The PhD candidate will work on one aspect of the research program, as a member of a broader research team.

The opportunity is suitable for people with quantitative skills, H2A honours or postgraduate qualifications, and interests in work and health.
