# OPERATING INSTRUCTIONS – EV LINK

**This charging station uses the Chargefox app to allow simple and instant operation.**

## Getting started

1. Download the Chargefox app.

2. If you have not registered, please do so in the app.

## You're ready to power up

3. After registration, select your charging station in the chargefox app and unlock your port.

4. The charging station will emit a "beep" sound.

5. Press the flashing green button on the charging station port to open the selected charge port.

6. This station operates on a BYO cable system to allow vehicles of all plug types to charge. Plug your cable into the socket on the charging station then into the car.

7. You can end the charging session via the Chargefox app.

## Emergency stop:

**In case of emergency** press the RED stop button to shut down and secure EV Link
