# TECHNOLOGY FOR EDUCATION IN CLINICAL HEALTHCARE (EdTech)

The current digital landscape provides exciting opportunities for educators to embrace the EdTech movement and create learning experiences that excite and motivate learners.

In this interactive online course, you'll discover how to use current technologies and social media tools to creatively and effectively design your teaching activities.

With consideration for the importance of human cognitive processing in eLearning, our international faculty will also cover basic principles of educational design.

## LEARNING OBJECTIVES

- Develop online education material and host it in a Learning Management System.
- Use technology to enhanced learning activities inside and outside the classroom.
- Use social media to engage your learners.
- Design short videos for online teaching modules.
- Apply cognitive science and educational design principles to the design of your EdTech modules.

Our goal is for you to explore, and have fun with technology, so that you can feel comfortable incorporating it into your teaching immediately.

## WHO SHOULD ATTEND?

Technology for Education in Clinical Healthcare (EdTech) is designed for educators who want a head start in creating engaging interactive learning resources.

It is for educators who seek a guided experience in evaluating and experimenting with new technologies and an opportunity to explore current educational and cognitive science research in order to develop programs grounded in sound educational principles.

## ACCELERATE YOUR QUALIFICATION

Eligible participants who complete the assessed version of this short course can receive 6 credit points towards the Graduate Certificate of Health Professions Education.

**Duration:** 10 weeks total  
(8 weeks of active learning)

**Delivery:** Online

**Course dates:** 22 August –  
24 October 2022

**Course price:**  
\$2,170 short course,  
\$2,490 Micro-credential

Monash alumni and staff  
discounts available.

***“Enrolling in EdTech was my best decision as an educator/academic. The course has introduced and taught me valuable skills, new technology and principles that I can apply immediately to improve my teaching skills and strategies”***

– EdTech participant, 2021
